Document L4 Requirements

| RID ID PDR 506 |
| Review SDPS |
| Originator Ref NA |
| Priority 2 |

Section 4.4.1.21   **Page** 4-75   **Figure Table** NA

Category Name Design-Data Server   **Actionee** HAIS

Sub Category

Subject Snoop proof?

Description of Problem or Suggestion:

With respect to #S-DSS-04460, this says that someone/everyone will have the ability to find out every item of data received by a particular user. Will the scientists stand still for this amount of oversight or ability to snoop? Does this violate privacy laws? How is this information protected from a hacker?

Originator's Recommendation

Take a second look at this requirement

GSFC Response by: **GSFC Response Date**

HAIS Response by: Eisenstein   **HAIS Schedule**

HAIS R. E. T. Smith   **HAIS Response Date** 6/12/95

The DID's section and page references have changed. The applicable requirements are DSS-30380, 30390, 30400, which reference the logging of the total number of data items distributed along with distribution destination and User ID. This information is required from a billing & accounting standpoint and is privileged information. The system is flexible so that it can support different accessibility models, which will be a function of the site's policies. The ECS developer has been mandated to produce a system that can be tailored and is not preset into policy decisions.

An ECS Information Security Plan is available and may provide more information for the requestor.
